

Post-Migration Performance Dashboard

System Health Indicators

Database Performance

- **Query Response Time:** [Current] vs [Baseline] vs [Target]
- **Connection Count:** [Current] vs [Maximum] vs [Typical]
- **Database Size:** [Current] vs [Pre-migration] vs [Expected]
- **Cache Hit Ratio:** [Current] vs [Target] vs [Optimal]

Application Performance

- **Page Load Times:** [Current] vs [Baseline] vs [Target]
- **User Session Count:** [Current] vs [Typical] vs [Capacity]
- **Error Rate:** [Current] vs [Baseline] vs [Threshold]
- **Feature Availability:** [Current] vs [Expected] vs [SLA]

Infrastructure Metrics

- **CPU Utilization:** [Current] vs [Baseline] vs [Capacity]
- **Memory Usage:** [Current] vs [Baseline] vs [Capacity]
- **Disk I/O:** [Current] vs [Baseline] vs [Capacity]
- **Network Throughput:** [Current] vs [Baseline] vs [Capacity]

Business Process Validation

Critical Functions Status

- ☐ Order Processing: [Functional/Issues/Failed]
- ☐ Inventory Management: [Functional/Issues/Failed]
- ☐ Financial Reporting: [Functional/Issues/Failed]
- ☐ User Authentication: [Functional/Issues/Failed]
- ☐ External Integrations: [Functional/Issues/Failed]

User Experience Metrics

- **User Login Success Rate:** [Current] vs [Target]
- **Support Ticket Volume:** [Current] vs [Baseline]
- **User Satisfaction Score:** [Current] vs [Target]
- **Training Completion Rate:** [Current] vs [Target]

Action Items and Follow-up

Immediate Actions (0-24 hours)

- ☐ [Action Item 1 with Owner and Due Date]
- ☐ [Action Item 2 with Owner and Due Date]

Short-term Actions (1-7 days)

- ☐ [Action Item 1 with Owner and Due Date]
- ☐ [Action Item 2 with Owner and Due Date]

Long-term Optimizations (1-4 weeks)

- ☐ [Action Item 1 with Owner and Due Date]
- ☐ [Action Item 2 with Owner and Due Date]
